New York, NY | 646-821-2157 | [bhaleraoyash6@gmail.com](mailto:bhaleraoyash6@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Website](#)

Full-stack engineer specializing in high-throughput, low-latency distributed systems

## PROFESSIONAL EXPERIENCE

### **Software Engineer** - MarketAxess

January 2024 - Present

Tech stack : [Java, Swing, FIX Protocol, Oracle SQL, C#, Ranorex Studio]

New York, NY

- Bondlink Fixed Income Trading Platform :
  - Expanded Emerging Markets platform to 4 new regions and integrated a new trading venue, driving 20% user adoption growth by owning the full trading lifecycle across UI and Trading API
  - Built a self-service trade data report generation feature with on-demand UI triggers and automated scheduled delivery, directly enabling onboarding of a new institutional client with 20-30 users
  - Addressed tech debt by consolidating 6-7 redundant trading protocols into 2 unified protocols, reducing code duplication and accelerating future feature development
  - Mentored 4 interns across 2 summer cohorts on migrating TCP communication to Kafka messaging and introducing distributed tracing with spans visualized via Grafana to resolve post-trade message loss
  - Developed and maintained 30+ C# automation scripts, reducing regression testing time while expanding feature coverage across critical trading workflows

### **Associate Software Engineer** - MarketAxess

June 2023 - December 2023

Tech stack : [Java, Swing, FIX Protocol, Oracle SQL, Spring Boot, React, Kafka]

New York, NY

- Bondlink Live Markets :
  - Onboarded onto a complex FIX-based fixed income trading platform, contributing to Live Markets and Trading API feature development
  - Launched support for 3 new trading protocols on the Live Markets platform

### **Software Engineer Intern** - MarketAxess

June 2022 - August 2022

Tech stack : [Java, JavaScript, Oracle SQL, React, Swing]

New York, NY

- Bondlink Fixed Income Trading Platform :
  - Built a mock nodeJS backend server with a modernized React UI using AG-Grid component to simulate RFQ bond flows, enabling 20+ developers to recreate and debug Single and List trades
  - Eliminated randomization by enabling file uploads and scraping ~1GB HAR files for payload/response data, achieving 100% scraper accuracy
  - Added a trade history tab with 1-day and 30-day activity filters, enhancing user visibility
  - Wrote a SQL script to clone users and assign bond trading permissions and preferences, reducing setup time from 1 week to ~1 hour

### **Salesforce Developer** - Cloudwerx

November 2020 - July 2021

Tech stack : [Apex, Aura, LWC, SOQL, JavaScript, HTML, CSS, Rest API]

Pune, India

- My Plan Manager :
  - Built a backend-driven onboarding platform with workflow automation, cutting processing time from 1 week to 1 day and boosting satisfaction by 80%
  - Integrated REST APIs with Google Drive/Calendar, automating secure scheduling and document workflows, reducing turnaround time by 60%
  - Developed a multi-page workflow system serving 1,000+ customers, improving efficiency and participation by 20%

## SKILLS

- **Programming Languages** - Java, Python, C#, Apex, JavaScript, HTML, CSS, C++
- **Databases** - Oracle SQL, Microsoft SQL, MySQL, SOQL
- **Tools** - Git, Jira, Bitbucket, REST APIs, Postman, CI/CD, Ranorex Studio, Jenkins, Control-M
- **Frameworks** - FIX Protocol, Swing, Spring Boot, React, Salesforce, Aura, Lightning Web Components

## EDUCATION

- **MS, Computer Science** - New York University New York, NY | September 2021 - May 2023
- **BE, Information Technology** - University of Pune Pune, India | August 2016 - May 2020
